

RE Grid Connected Resources

Current:

- Most of the small, mini and micro hydropower plants (less than 25MW)
- Pilot Wind Power project (600KW)

Existing Policy Measures

- Alternative Renewable Energy Policy in 2013
- Formulation of rules and regulations- Draft
- RE Resource Assessment Plan- Draft
- Feed-in-Tariff Framework- Draft

Financing Mechanisms

Renewable Energy Development Fund – BUT not operational yet

Incentives and Subsidies – Project Based RE

Success & Challenges

Success:

- Hydropower plants (<25MW) still operational

Challenges:

- To develop the Feed-in-Tariff framework due to the limitation of capacity resources
- Have the RE tariff at a comparable rate with the existing hydropower tariff
- No funds for operating REDF
